

mind the crap

GRADUATES/POST-GRADUATES

Beaconsfield, Bucks

(30 minutes from Marylebone)

Excellent Salary + pre-IPO share options + relocation

Leaving University is all about making choices... the right choices. Do you want to catch the slow train to middle-aged middle management in a big company? Or a quicker train to a dead-end in a 'diabetic dog food dot com' without real funding, real technology or real prospects? We reckon we can offer bright graduates (or recent graduates ready to jump train) a fast track to a fun and rewarding career within a well-funded pre-IPO transatlantic Internet software company with an awesome technology and limitless potential.

At our development centre in Beaconsfield, Bucks., we are building small, non-hierarchical teams to deliver a sophisticated digital rights management (DRM) application to publishers all over the world to bring new and exciting commercial digital content (e.g. streaming audio/video, text, images, software) to consumers via PCs, palmtops and the next generation of net-enabled consumer devices. Our software will fundamentally change the publishing and entertainment industry and you could be part of making this happen.

If you are (or will be) a computing, engineering or science graduate with some programming experience and want to get your career on the right track, then you ought to think about catching the SealedMedia train. We can promise you a fast-paced, fast-learning environment where you can make a real and immediate impact. We can promise you work in small, tightly knit teams on challenging projects – the C++ and Java software you develop will be used by millions of consumers all over the world. We can promise you early responsibility, immersion in the very latest technologies and a real share in our success through significant pre-IPO share options.

Don't miss our train...
