

# anyone can see the power of e-business...

# ...very few can really deliver it

## CRM for Financial Services

**£35k - £100k + flexible benefits  
Based Twyford, near Reading**

In today's fast-moving and highly competitive world, the customer is king! Business survival in the 21st century is now crucially dependent on the quality of customer service which is why more and more companies are rushing to implement web-based customer relationship management (CRM) solutions, making this one of the fastest growing and most exciting sectors of the IT industry.

At CSC, a multi-billion dollar provider of IT, application software and consulting services worldwide, we have pioneered some of the most inspired and innovative concepts in CRM and on-line solutions within the financial services sector today. Our product, 3r Evolution, delivering unmatched business functionality across multiple distribution channels such as call centres, WAP, digital TV and the Internet, is literally revolutionising the way insurance companies and banks all over the world do business.

Due to our market leading position within financial services and unprecedented demand from customers, we now need more talented IT professionals like you, who are as passionate about technology as you are about customer service. If the idea of working with distributed architectures, the latest web technologies and personal content management tools appeals, then you're already half-way there.

### Developers Development Team Leaders Technical Architects

We will expect you to have at least two years' OO development experience using C++ and/or Java across the full lifecycle on at least one major project. Training in Java and other key technologies will be provided where necessary. Experience of RDBMS, middleware and internet solutions would be an advantage. Knowledge of CTI and workflow applications or document management would be useful.
